[2026-07-21 03:55:03.229] [ctranslate2] [thread 15624] [warning] The compute type inferred from the saved model is float16, but the target device or backend do not support efficient float16 computation. The model weights have been automatically converted to use the float32 compute type instead.
🔊 Speak now... (recording stops automatically on silence)
📝 Transcribed text: What is the capital of Saudi Arabia?
🗨️ Model reply: The capital of Saudi Arabia is Riyadh. It is the largest city in the country and is located in the center of the Arabian Peninsula on a large plateau. Riyadh has a rich history, dating back to the 4th century BCE when it was known as 'Hajar'. It was the capital of the Al-Yamamah region and later became the seat of the first Saudi dynasty in the 18th century.

📄 Transcribed text: Assalamu alaykum.

🗨️ Model reply: Wa alaykum assalam. I am an AI assistant chatbot and not a human, so I don't have a physical body. Is there anything I can help you with?

🎤 Speak now... (recording stops automatically on silence)

🗣️ Transcribed text: How are you?

🗣️ Model reply: As an AI language model, I don't possess emotions or physical well-being, so I don't experience health or feelings in the same way that humans do. However, I'm fully operational and ready to assist you with any questions or tasks you might have. Is there something specific you'd like to know or discuss?
